

November/2008

## Dolbey Stands Front and Center at AHIMA in Seattle

As the doors opened on the morning of October 6th, the 2008 AHIMA Convention and Exhibit had officially begun. Excitement is always in the air as the first large group of attendees stride down the main aisle in search of new solutions. This year, Dolbyby was front and center with an 1200 square foot booth space near the entrance. "Speech Recognition" and "Dolbey" were shining brightly overhead.

Dolbey staff and Dealer sales representatives were on hand to provide demonstrations of Dolbyby's newest product, Fusion CAC™ computer-assisted coding software. With this year's new release of Fusion CAC™, the AHIMA attendees were given a first look at seeing this revolutionary software in action.

The registration portion of the booth was buzzing with excitement over guest speakers Cecilia Hilerio of Robert Wood Johnson University Hospital and Mary Radley of Children's Hospital Boston. Cecilia and Mary spoke about the successes they have had with the Fusion products they have installed at their facilities.

Attendees were also given a chance to play The Coding Game™ and receive a Dolbyby Bear.

We would like to thank all of you that stopped by to say Hello!

## Health Information and Technology Week

**November 2 - 8, 2008**

HI&T Week is a showcase for the thousands of health information management (HIM) professionals who perform their duties masterfully throughout the year. The American Health Information Management Association (AHIMA) is honored to provide support, representation, and training to HIM professionals for these valuable contributions to the healthcare industry.

This year's theme, "The Strength of Technology, The Power of Care" is intended to spread the idea that sound principles are maintained as medical information evolves from the paper to the electronic world.

## Dolbey Travels to Chicago to Exhibit at RSNA

Dolbey will be traveling to RSNA (Radiological Society of North America) in Chicago this year to exhibit. The dates are Sunday November 30th through Thursday December 4th. Dolbey's booth number is 7349.

As many know, this is the largest show in healthcare, drawing upwards of 65,000 people between attendees and exhibitors from around the world.

Dolbey will be featuring Fusion Expert™ front-end speech recognition at the show and looking to demonstrate the product's competitive offerings. Fusion Expert utilizes the SpeechMagic™ engine and is a fully integrated component of the Dolbey Fusion suite of products including Fusion Text® transcription software, Fusion Voice® dictation and Fusion Speech® background speech recognition. Fusion Expert is available in many different contexts including Radiology.

Fusion Expert gives the physician or radiologist more control over their reports from dictation and correction to signature, assisting in the ever present demand for faster access to clinical information and improved patient care. Fusion Expert can significantly reduce report turnaround

Children's Hospital Boston decided to apply Lean Six Sigma and change management techniques within one pilot project to achieve efficient and timely report creation - a challenge common to all healthcare providers.

The Dolbey transcription platform Fusion Text® and Fusion Speech® were installed to streamline report creation, increase transcription turnaround time, and to facilitate the linking of reports to the patient's registered visit.

"Today, up to 90% of all reports are produced in less than a day" says Mary Radley, Director of Medical Records Services.

## About Dolbey

Since 1914, Dolbey has delivered timely solutions with an emphasis on customer partnering.

With expert solutions and fast, local support from locations in most major cities in North America, Dolbey is the company you need to address your fast changing requirements.

We provide the most integrated solution for dictation,

time, dramatically lowering transcription costs and potentially eliminating the need for outsourced transcription.

Please feel free to stop by our booth if you or one of your colleagues are attending RSNA this year. We would be happy to provide a hands on demonstration of our Fusion Expert software.

transcription, speech recognition and computer-assisted coding.

This is our mission and our accomplishment.
